FOR IMMEDIATE RELEASE

**Frenchman's Creek Announces Build  
of New \$74 Million Clubhouse Project**

NORTH PALM BEACH, FL – February 9, 2022 -- Frenchman's Creek Beach & Country Club members recently approved a \$74 million new state-of-the-art 124,450 square foot clubhouse designed by Peacock + Lewis. Demolition of the existing clubhouse building will start in the late summer of 2022, with the new clubhouse projected to be completed in late 2024.

The new multi-level clubhouse will combine classic and coastal contemporary design, including a beautiful main lobby, reception area with sculptural lighting, a spacious ballroom and main dining room featuring a large two-story clerestory cupola with abundant natural light and sweeping views of the community's two 18-hole golf courses.

The new clubhouse will include a Grille Room, a Sports Bar and a 19th Hole Bar with both indoor and covered outdoor seating, women's and men's Cardrooms and Locker Rooms, Golf and Tennis Shops, new Pickleball and Tennis Courts, Kids Creek Club facilities, a golf cart barn, and additional meeting rooms with endless possibilities to meet the needs of the Frenchman's Creek residents-only community.

Frenchman's Creek Beach & Country Club has two 18-hole golf courses, the North Course, designed by Jim Fazio, and the South Course, designed by Robert Cupp, and provides the highest quality of private golf instruction and service. The 24,000 square foot stand-alone luxury spa and fitness facility offers state-of-the-art equipment, personalized training, and the latest beauty and spa treatments, including a luxurious pool and lounge area. In addition, the Tennis Facility hosts weekly clinics for all ages, personalized training, and numerous play options and events on lighted Har-Tu tennis courts that fit all skill levels with additional Tikkyball, Bocce Ball, and Pétanque courts. The Frenchman's Creek Beach Club is located a short drive away, nestled in the quaint Town of Juno Beach on pristine beaches and gorgeous blue gulfstream waters.

"Our Member Clubhouse Committee and Board have worked tirelessly to incorporate the desires of our members into the clubhouse design. We believe this new clubhouse will enhance our member experience and further highlight our club as a premier country club in South Florida," said Frenchman's Creek club president Diane Exter.

The Frenchman's Creek Clubhouse Project implementation has already begun with final design submittals being prepared for the governmental authorities. Peacock + Lewis Architecture & Interior Design created the new clubhouse design and has been a design partner at Frenchman's Creek for the past 23 years. P+L has worked with community advocates for the past four years creating solutions for the new clubhouse.

"We are proud that the Frenchman's Creek membership has shown such strong support for this final solution which has combined the best aspects of previous designs with current features, responding to the changing lifestyles of this evolving multigenerational community" stated Brian Idle, CEO of Peacock + Lewis. "When completed, this clubhouse will be the new standard by which amenities in other communities will be measured."

**Frenchman's Creek Beach & Country Club** is a residents-only, year-round private beach and country club featuring beautiful homes in South Florida. Frenchman's Creek Beach & Country Club is distinct from all neighboring communities, not simply because of its exquisite selection of homes but because of its exclusive lifestyle, that cannot be easily replicated.
